Invitation to the 15th International PhD Seminar on chromatographic Separation Science (SoCSS 2019)

Dear participants,

The Planning Committee is pleased to invite you to the 15th International PhD Seminar on Chromatographic Separation Science (SoCSS 2019). The seminar will take place February 24-26, 2019 in Quedlinburg (Harz), Germany.

Since its foundation in 2001, SoCSS is the event for the presentation and discussion of current PhD research in the field of chromatography and allied techniques. Attendees will have the unique opportunity to present their research and build their professional network in a relaxed and casual environment. However, seminar participation is not limited to PhD students. Alumni in industry are also invited to share scientific contributions concerning state-of-the-art research and development as well as offer feedback and input from an industrial point of view.

Topics of interest include, but are not limited to the following areas:

- Fundamentals of chromatography
- Process development, intensification, and scale-up
- Modeling, simulation, and optimization
- Continuous chromatography
- High-throughput solutions

We are looking forward to this year's interesting and varied program.

Kind regards,

The SoCSS 2019 Planning Committee
